### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 November 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 9-13, 23-30, and 32-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/01/2004. Further, applicant has cancelled these claims.

### *Drawings*

2. The drawings filed on 10/3/2003 are accepted by the examiner.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 8, 14-23 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 2,666,479 to Clinton ("Clinton").

Clinton discloses in Figures 1-5 the invention substantially as described in applicant's claims 1-6, 8, 14-23, and 31. In particular, Clinton shows a torch (10) having a torch butt with an attached handle portion (17) (see Fig. 1), a valve assembly operable to control a first flow of fluid through the torch butt (see Fig. 2 and col. 3, lines 25-36)), and a lever (21) selectively

Art Unit: 3749

securable to pivot about first and second portions of the torch butt. The valve assembly, including lever (21) is arranged in a first orientation relative to the torch butt and may be moved to a second portion that is inverted from the second position (see Fig. 1 and col. 4, line 46 through col. 5, line 15). Clinton further discloses that the torch includes the necessary sealing and sealing means (see col. 3, lines 37-64), a second throttling valve assembly (16), and handle portion (17) has an upper radius and a lower radius that are uniform along the length of the handle (see Fig. 5).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3749

7. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clinton as applied to claim 1 above in view of U.S. Patent No. 5,571,427 to Dimock et al. ("Dimock").

Clinton discloses all the limitations of claim 7 except that the handle has a skull-shaped cross section.

Dimock teaches a torch in the same field of endeavor as Clinton. In Dimock the torch includes a handle (16) that has a D/skull shaped cross section (see Fig. 6).

Therefore, in regard to claim 7, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the torch handle of Clinton to incorporate the D/skull shape of Dimock as this shape desirably provides a better ergonomic fit and better gripping surface for the hand of the operator and reduces the wasted space associated with rounded handles (see Dimock, col. 5, lines 11-15).

### ***Conclusion***

8. This action is made non-final. A THREE (3) MONTH shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents to Barna, Smith, Steventon, Mills, Jr. et al., Mims et al., and German Patent No. 2 101 127 are cited to further show the state of the art concerning torch assemblies.
